

How to install CLEANED ?

1. Download and install R.

<https://cran.r-project.org/bin/windows/base/>

2. Download and install Rstudio

<https://www.rstudio.com/products/rstudio/download/>

3. Open Rstudio, in the top menu, select 'open' , go to your CLEANED folder, then to Cleaned version 2\5-installation & documentation\install CLEANED and select install_package.r. R file
4. Select the all command lines in the install_package command file and press R

Note you need an internet connection in order to install these packages.

This procedure needs to be done only once, after having installed R and R studio.
